Domestic water testing for household consumption

The testing suites described here are designed to provide fit for purpose testing needs for determining the suitability of private water sources (bore, dam, river, roof/tank etc.) as safe and appropriate for human and animal consumption.

Please note if you are a supplier, please review the requirements on the Taumata Arowai website: www.taumataarowai.govt.nz

Three suites available

1. Full chemistry profile with Microbiology (E. Coli)

pH, Conductivity, Turbidity, TDS (Total Dissolved Solids), Alkalinity, Total Hardness, Nitrate as Nitrogen, Chloride, Sulphate, Calcium, Magnesium, Potassium, Sodium, Arsenic, Lead, Boron, Iron, Manganese, Copper, Zinc, E. Coli (MPN)

2. Chemistry only

pH, Conductivity, Turbidity, TDS (Total Dissolved Solids), Alkalinity, Total Hardness, Nitrate as Nitrogen, Chloride, Sulphate, Calcium, Magnesium, Potassium, Sodium, Arsenic, Lead, Boron, Iron, Manganese, Copper, Zinc

3. Microbiology only (E. Coli)

E. Coli (MPN)

Note: Each suite will vary in cost.

ALS NZ does not provide consulting services on results or how to treat your water. Our recommendation is to present the analytical report to appropriately qualified water treatment or water quality consultants.
